

BHUVANESH GOPAL

IT Infrastructure & Cloud Support Engineer

+91 9597916799 | bhuvanesh2228895@gmail.com | [Portfolio](#) | [LinkedIn](#) | [GitHub](#)

PROFESSIONAL SUMMARY

IT professional with hands-on experience managing multi-site infrastructure, network security, and system administration, paired with growing expertise in AWS cloud services, Docker, and CI/CD pipelines. Combines enterprise IT support with a software development background to bridge traditional infrastructure and modern DevOps practices.

WORK EXPERIENCE

IT Services Executive | Lanson Motors Private Limited

Sep 2024 – Present

- Maintained uptime of the Toyota Dealer Management System (CTDMS) and core business applications by delivering hardware, software, and network troubleshooting support across multiple company locations.
- Strengthened network security by configuring and maintaining routers, switches, and firewalls, and by creating custom firewall rules and port-forwarding configurations to control external access.
- Reduced unauthorized access risk by administering user accounts, permissions, and access controls, and managing Outlook Exchange and Microsoft Office 365 environments for all employees.
- Safeguarded confidential business data by managing NAS storage systems and enforcing secure data-access policies across departments.
- Improved employee productivity by providing responsive remote and on-site system support, resolving hardware, software, and connectivity issues company-wide.

PROJECTS

Android Malware Detector API | Personal Project

- Built a machine-learning REST API that classifies Android APKs as malicious or benign by performing static analysis with Androguard and classification with CatBoost.
- Ensured tamper-proof threat records by integrating a blockchain domain layer for immutable logging of detected malware signatures.
- Delivered the detection engine as a REST API in Python, enabling straightforward integration into external security tooling.

TECHNICAL SKILLS

Network & Security: Firewall & Router Configuration, Firewall Rule Management, Port Forwarding, Network Security

System Administration: Windows Server, Active Directory, NAS Storage Management, Remote Support, User Access Control, System Troubleshooting

Cloud & DevOps: AWS (EC2, S3, IAM, Route 53, CloudWatch), Docker, Infrastructure as Code, Linux Administration (Ubuntu), CI/CD Pipelines

Tools & Platforms: Git & GitHub, Microsoft Office 365, Outlook Exchange Admin, CTDMS (Toyota DMS)

Development: Python, Node.js, HTML, CSS, JavaScript, Bootstrap

EDUCATION

Sri Balaji Chockalingam Engineering College, Tiruvannamalai

Jun 2021 – May 2024

B.Tech, Information Technology — Anna University (Affiliated)

Sri Venkateswara Polytechnic College, Vellore
